Archaea
Bacteria
Eukaryotes
Viruses
Count
GC content
Mean GC contents (%) of protein-coding genes per species
Abundance
Amino acid
Mean amino acid abundances (%) per species
1 - Aliphatic
2 - Aromatic
3 - Charged
4 - Uncharged
Difference
Percentage differences (%) between empirical and expected abundances per species
Codon number
Codon+GC
Density
Correlation coefficient (r_S)
Spearman correlation coefficients per species
Correlation coefficient (τ)
Kendall's Tau correlation coefficients per species
